Illegal sharing of controlled medication

Recently I've been having trouble getting to sleep and feel lethargic all day

I used to be like that but the doctor prescribed me sedative sleeping tablets and they worked really well. I've still got some left do you want to try?

Can I really try your medication?

NO!

Most sedative sleeping tablets are controlled medication that can only be prescribed after an assessment conducted by a doctor. Handing over or sharing such medication to a third party is illegal.

Remember, handing over sedative sleeping tablets or any other controlled medication is a violation of the Narcotics Hazard Prevention Act and can result in a jail sentence of up to one year and a maximum fine of NT\$100,000.

Chia sẻ các loại thuốc phải kiểm soát đặc biệt là hành vi trái phép!

Gần đây tôi không ngủ được khiến ban ngày cảm giác thật uể oải.

Trước đây tôi cũng như thế, sau này bác sĩ kê đơn thuốc an thần gây ngủ cho tôi, rất hiệu quả. Tôi vẫn còn thuốc đây này. Bạn có muốn dùng thử không?

Tôi thực sự có thể thử không? ...

Không được!

Hầu hết thuốc an thần gây ngủ đều là thuốc phải kiểm soát đặc biệt, chỉ được bác sĩ kê đơn sau khi đánh giá. Việc nhường lại hoặc chia sẻ thuốc một cách riêng tư là hành vi trái phép!

Nhắc nhở bạn, tùy tiện chuyển nhượng các loại thuốc phải kiểm soát đặc biệt như thuốc an thần gây ngủ, có thể sẽ vi phạm quy định phòng chống tác hại của ma túy, sẽ bị **phạt tù dưới 1 năm** và **phạt tiền dưới 100.000 Đài tệ**.

Berbagi Obat Terkontrol Secara Ilegal

Akhir-akhir ini saya sering susah tidur, dan jadi tidak semangat sepanjang hari

Saya dulu juga begitu, tapi setelah dokter memberi saya benzodiazepine, khasiatnya sangat baik. Ini saya masih ada, kamu mau coba?

Benarkah saya boleh mencobanya?

Tidak boleh!

Sebagian besar benzodiazepine termasuk obat terkontrol, dan hanya bisa diberikan oleh dokter setelah melalui evaluasi. Memberikan atau membagikan obat secara pribadi adalah tindakan ilegal!

Kami ingatkan, secara sembarangan memberikan obat penenang tidur yang termasuk obat-obatan terkontrol, dapat melanggar “Undang-Undang Pengendalian Bahaya Narkotika”, pelanggar dapat dikenakan hukuman pidana penjara hingga 1 tahun dan denda maksimal NT\$100.000.
